IMPLEMENTATION GUIDE & MEASURES

Topic	Guidance
Objective	Make the first 30 days clear, welcoming and trackable, with visible task ownership and planned check-ins.
Ownership principle	HR coordinates the process and policy steps; the hiring manager owns role clarity and integration; IT supports equipment/access; the new hire participates and raises questions.
Suggested measures	Day-one access readiness; task completion by target date; mandatory orientation completion; unresolved blockers by age; feedback at day 7/15/30.
Data protection	Do not enter identity numbers, bank account details, health information or copies of personal documents in this tracker. Use approved secure systems and follow retention/access policies.
Localisation	Document requirements, right-to-work checks, payroll setup, safety training and policy acknowledgements vary by location and employer. Confirm local law and internal policy before use.
Limitations	This is a generic portfolio template, not legal advice or a claim of an implemented company process.
Pilot approach	Ask HR, a manager and a new hire to review the template; remove irrelevant tasks, assign owners and trial the process before standardising it.
